

## HighJump TrueCommerce EDI Solutions

### We Make EDI Painless

HighJump TrueCommerce EDI Solutions make it painless to implement Electronic Data Interchange (EDI), the most widely used form of business-to-business electronic commerce, by making it simple, easy to use and affordable. With HighJump TrueCommerce EDI Solutions you get:

- Everything needed to implement EDI from one source
- Low software and transmission costs
- No annual maintenance fees
- Free software updates
- Free support from the HighJump TrueCommerce Solutions Group

### Easy to Use

**Our unique modular approach enables us to offer a true end-to-end solution that is simple to use and scales easily to fit your business requirements. We've taken the complexity out of implementing EDI by providing all four of the components you need to successfully deploy EDI:**

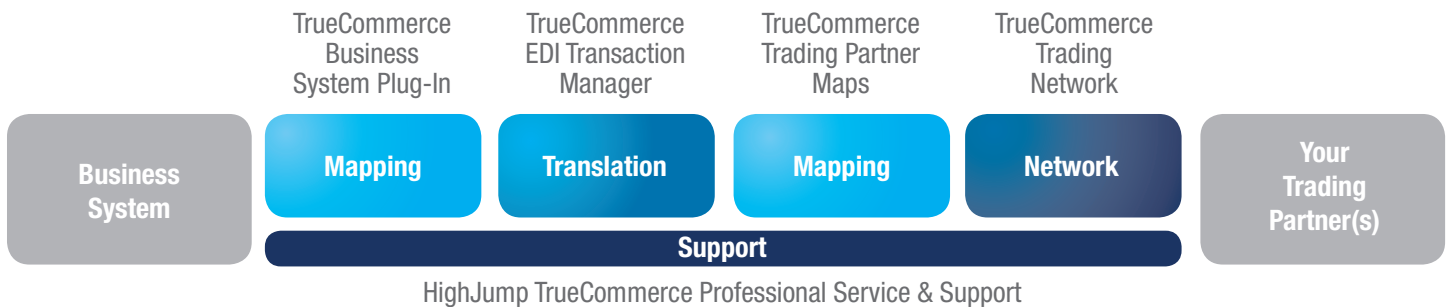

**Connectivity** with your trading partner(s) is required to transmit EDI documents, whether directly via the Internet or through a "Value Added Network", or VAN. TrueCommerce Trading Network (VAN) is our Internet-based transaction gateway, across which your EDI transactions are transmitted, providing connectivity with all of your trading partners. TrueCommerce Trading Network is compliant with virtually any connectivity protocol, including AS1/AS2/AS3, FTP and (if required) VAN interconnects.

**Translation Software** is required to convert the raw EDI data into a meaningful format. TrueCommerce EDI Transaction Manager™ is our user-friendly translation software that converts business documents into the ANSI ASC X12 EDI standard. In addition, it converts the data out of the standard into a meaningful format, such as a human readable business form.

**Data Mapping and Integration** provide the ability to seamlessly import and export information from EDI-based transactions to and from your business system, as well as to properly format transactions sent to your trading partners. TrueCommerce Trading Partner Maps are a collection of intelligent software modules—already set up and ready for you—that are programmed to format your inbound and outbound transactions so they match your trading partners’ requirements. To add trading partners, you simply auto-connect additional Trading Partner Maps. Our TrueCommerce Business System Plug-In™ maps your EDI transactions, so they seamlessly transfer to and from your business or accounting system. You will have one specific TrueCommerce Business System Plug-In for whichever business system you are operating. If you upgrade your business system, simply swap out your plug-in and the rest of your EDI solution remains intact.

**Support** for all of your EDI needs requires a broad range of expertise. An in-depth understanding of the specific implementation requirements of each trading partner is critical, as is a thorough understanding of the issues related to integration and the technical aspects of sending and receiving transactions electronically. Because TrueCommerce EDI is an end-to-end solution, we have teams of knowledgeable professionals supporting each and every aspect of the EDI process.

## Affordable

When it comes to EDI, HighJump TrueCommerce EDI Solutions deliver unsurpassed value. Rather than requiring you to utilize a combination of expensive third-party providers, we deliver and support your entire EDI solution. This enables us to provide valuable cost-saving benefits that no one else can offer:

- **Free, unlimited phone access to our friendly and knowledgeable customer support professionals**  
Available Monday through Friday, 8:00 a.m. to 7:00 p.m. EST.
- **Free Trading Partner Map updates**  
When your trading partner modifies their EDI requirements or implements a new transaction, we'll send you an auto-installing upgrade to the associated TrueCommerce Trading Partner Map at no charge.
- **No hidden network fees**  
Enjoy substantial savings vs. traditional VAN fees
- **No annual contract or annual maintenance fees**  
Cancel your TrueCommerce Trading Network subscription at any time if not completely satisfied
- **Advance Ship Notice (ASN) module included**  
For added functionality, purchase TrueCommerce Electronic Labeling Plug-In™ and auto-generate UCC-128 numbers

▶ HighJump TrueCommerce EDI Solutions customers exchange tens of millions of EDI transactions annually within a variety of industries, ranging from manufacturing and distribution to retail and government.
